

IMPROVE YOUR FITNESS WHILE IMPROVING THE ENVIRONMENT

fitPAK CELL supplement packaging is an ideal, Eco-friendly alternative to traditional supplement packaging. Typically, such packaging comprises large, oversized plastic containers. The fitPAK CELL packaging is an affordable, guilt-free, self-contained alternative to messy powders typically packaged in large carbon footprint containers. They provide a more efficient approach to green fitness by using 100% FDA approved edible film to provide a 100% biodegradable and consumable packaging with zero waste.

The fitPAK CELL supplement packaging has been specifically designed to deliver enhanced fitness performance with environmental benefits throughout the life of the product – from raw ingredients through manufacturing to consumption and disposal.

BENEFIT 1: Environmentally Friendly

- Eco-Friendly
- Promotes GREEN Fitness
- 100% Water Soluble Film
- 100% Biodegradable
- 100% Consumable
- 100% FDA Approved Film
- No Packaging Waste
- Reduced Landfill Consumption
- Reduced Environmental Impact
- Minimal Storage/Shipping Requirements

BENEFIT 2: Natural and Edible Ingredients

- Unlike plastic packaging made from petroleum, fitPAK CELL supplements are made from a revolutionary and innovative FDA approved water soluble film that is 100% biodegradable and consumable.
- Film is made from edible cellulose polymers, which completely dissolves in cold water.

BENEFIT 3: Reduced Product Waste

- Accurate Unit Dosage
- Guarantees Perfect Portions
- No Powder Spills
- Dissolves Completely in Liquid
- Quicker Supplement Delivery to Body
- Durable Film Isolates and Protects Powders from Environment

BENEFIT 4: Responsible Manufacturing

- Requires less total energy to make
- Generates fewer greenhouse gas emissions
- Uses fewer fossil fuels in production
- Produces lower amounts of a wide variety of air emissions
